The Dimitech Speed-Reada introduces a new level of professional vehicle speed verification.

FUNCTIONALITY

- Vehicle speed measured, independent of vehicle speedometer
- Large high-brightness indicators for easy reading of vehicle speed
- Secure memory for logging speed, position and time data
- Infrared light communication with laptop or other devices
- CAN bus communication
- One isolated input and one isolated output for device control
- Built-in suction caps for window mounting
- Sleek and robust outer casing

APPLICATIONS

Road safety

- Displaying speed to the other drivers assists in safe decision making on the road
- Reduce the chances of front and rear collisions
- Reduce the chances of accidents with pedestrians or cyclists
- Helps for better personal self-control on the road
- Accident investigation - "Black Box" function

Other applications

- Sports cars and boats - racing and speed demonstrations (on approved facilities only!)
- Automotive research and testing - device can provide information about vehicle's behavior under various conditions
- Reference display - can be used everywhere to show numerical information on large, easy to read display: factories, offices, shops, etc

Show that you care!
